

CI/CD Log Analyzer Report

Status: **FAILED**

Source: sample_logs/jenkins_failed.log

Total lines: 13

Highest severity: high

Summary by category

- Docker: 1
- Infrastructure: 2
- Network / DNS: 1
- Network / Proxy: 1
- Tests: 1

Findings

Severity	Category	Rule	Line	Evidence	Recommendation
HIGH	Network / Proxy	PROXY_407	4	ProxyError: 407 Proxy Authentication Required while connecting to Artifactory	Check HTTP_PROXY/HTTPS_PROXY and Docker daemon proxy configuration.
HIGH	Infrastructure	DISK_SPACE	11	Filesystem /var/lib/docker Use% 100% used	Clean workspace/Docker cache or increase disk size on the build agent.
HIGH	Infrastructure	DISK_SPACE	12	ERROR: No space left on device	Clean workspace/Docker cache or increase disk size on the build agent.
MEDIUM	Docker	DOCKER_DAEMON	6	ERROR: docker pull failed for registry.example.com/demo/build-image:3.5	Check Docker service status, registry access, and daemon proxy settings.
MEDIUM	Network / DNS	DNS_RESOLUTION	7	Temporary failure in name resolution for artifactory.internal.example	Verify DNS configuration, VPN/corporate network access, and Artifactory host name.
